<p><b>A New Wood, Lyptus</b> is now available as a "Green" substitute for Mahogany. It is grown on plantations in Brazil where it is interspersed with native trees to help preserve the native ecosystems. Lyptus is a natural hybrid of two Eucalyptus species. See our website for more information.</p>	 <p>Lyptus, Dark Red Finish</p>	 <p>Lyptus, Red Finish</p>	 <p>Lyptus, Brown Finish</p>

Marshall Furniture is available through AV Systems and Contract Furnishing dealers. We will work with the dealer of your choice.

These colors are approximate. There will be a variation both in color and grain due to the printing process and to the natural variation in the color of wood. Free samples of our standard woods are available. If close color match is important, please submit a sample and we will produce a matching sample for approval. There is no charge for color match on orders over \$500. Call for pricing on other woods. We also work in plastic laminates and solid surface materials.

MSRP Catalog Prices Valid Through 5/31/06
